Skilled professional

## Project engineer - m/f

### Mission

As a member of the Sales Support Department, the Project Engineer is the key interface with the client's technical project engineer. He works with the Area Sales Managers and the technical department and he/she manages several projects in parallel, from conception to design to the on-site installation – including the integration of the different technical elements of the project, and logistics. He/she is responsible for delivering the projects on time, on budget and within the quality standards.

### Key responsibilities

- Design and develop the project planning as a whole (of planning of the global project (including specific technical components such as motors and ventilators) in collaboration with the departments concerned.
- Contact with the suppliers if necessary in order to specify the appropriate product, on-site installation, and product conformity.
- Confirming orders, management of key project milestones (receipt of components and equipment, overseeing production etc.) and preparation of internal documents.
- Industrialization and testing.
- Organization of the packaging and delivery of the integrated solution.
- Responsibility for invoicing, budget control and timely remittance of payments.

### Professional skills and experience required

- Master in Engineering (Civil or Industrial) Electric, Electromechanical or Mechanical.
- First professional experience from 1 to 3 years.
- Perfect command of English.
- Result oriented.
- Autonomous, proactive attitude, rigorous and tenacious.
- Interested in multifaceted challenges.
- Available to travel 15% of working time.
- Able to manage different types of issues.
- Analytical, synthetic and sense of decision.

**About KINOLT**

Our company was founded in 1989 by a team of innovative engineers who specialized in critical power systems. A lot has happened since. Over the past decades we evolved into a global partner securing infinite power to major businesses and industries across the globe. From Hong Kong to Santiago de Chile, from Frankfurt to Singapore.

In an industry where power outage is never an option, where reliable power control is absolutely mission critical, understanding the needs of our customers and their reality is not only important, it's a necessity. That's why, while we are in the business of electrical uptime and availability, our people are at the heart of our business. From project start to finish – even when things get challenging - we stand by our customers' side to ensure that nothing is left to coincidence.
